A noise is a sound that is unpleasant to the ears. However, a noise unpleasant to one person may be pleasant to another. In scientific terms noise is made by an irregular pattern of sound waves. There are a number of things which make our world unpleasantly or ever dangerously noisy, such as jet air craft, taking off, roaddrills, heavy traffic or loudspeakers. The sound waves bang into structures and cause them to vibrate giving rise to noise. In the process, they get damaged. In younger people deafness can be caused by too loud a noise or from prolonged exposure to loud noise produced by too much amplification or by a machine in the factory. The noise depends on the energy the sound waves carry. Decibel scale is used to measure loudness of the sound.

And all the Men and Women merely players. They have their exits and entrances. And one man in his time plays many parts, his acts being seven ages. At first the infant, Mewling and Pucking in the nurse's arm.

Then the whining school boy with his satchel and shining morning face, creeping like snail unwillingly to school. And then the lover signing like furnace with a woeful ballad made to his mistress eyebrow. Then a soldier, full of strange oath and beard like the pard jealous in honour sudden and quick in quarrel seeking the bubble reputation. Even in cannon's mouth.
